

## SEAMLESS PAINTED LOOKS

SuperMatte 3D Laminates from CABnX offer a low-sheen paint appearance in a low-maintenance product. An alternate to painted wood doors, the SuperMatte Series is available in 11 colors to complement any décor. The SuperMatte doors are constructed from a one piece engineered core to eliminate expansion, contraction, and stress cracks in the finish. The 3D Laminate surface material is very resilient and easy to clean. SuperMatte offers the look of a painted door without the hassles and maintenance of a wood door.

Along with the SuperMatte launch, CABnX is adding 4 new door styles, including Amesbury II, Shaker Elite, Landcaster Elite, and Shaker with Ogee. The new doors are available in all SuperMatte and Contempo offerings. The new SuperMatte Series by CABnX is a great addition to our existing quality line-up.

The 3D Laminate edge over painted wood doors:

- Arrives finished and ready for installation.
- Seamless construction means doors maintain their shape and uniform finish.
- Will not expand and contract with seasonal humidity.
- Low-maintenance and easy to clean.
